

Below are instructions to correct the "Access violation at address XXXXXXX in module 'QALiteProject.exe' Read of Address XXXXXXX."

Windows 10

Click on the Windows icon (lower left corner)

Select Settings

Type Control Panel in Find a Setting (upper right)

Click on Control Panel icon in task bar

Click 'System and Security'

Click 'System'

Left Panel Click on Advanced System Settings

Select Advanced Tab

Click on Settings

Select Data Execution Prevention Tab

Select radial button Turn on for all program and services except those I select

Click on Add button

Then add the program QALiteProject.exe found in C:\Program Files (x86)\IrisQA\CTQALite

Then click Apply

Ok to close then restart computer

Windows 7

Click Start Icon

On the right panel right click on Computer

Select Properties

Left Panel Click on Advanced System Settings

Select Advanced Tab

Click on Settings

Select Data Execution Prevention Tab

Select radial button Turn on for all program and services except those I select

Click on Add

Then add the program QALiteProject.exe found in C:\Program Files (x86)\IrisQA\CTQALiteV3.1

Then click Apply

Click Ok to close

Restart computer
